Sheet (part 1)

Researcher Skills Workshop - Madrid

Un proyecto de la comunidad ResearchOps Hashtag #researcherskills

Bienvenidas!

ResearchOps?

Una comunidad activa en Slack Con 1,600+ personas http://researchops.community/

Twitter https://twitter.com/teamreops #researchops

ResearchOps is the mechanisms and strategies that set user research in motion. It provides the roles, tools and processes needed to support researchers in delivering and scaling the impact of the craft across an organisation.

re+ ops

About this map

This map is the result of a global initiative by researchers for researchers to give shape to the emerging practice of ResearchOps. It's our V1.

It's the result of the analysis of data gathered via a survey and 33 #WhatisResearchOps workshops that ran around the world.

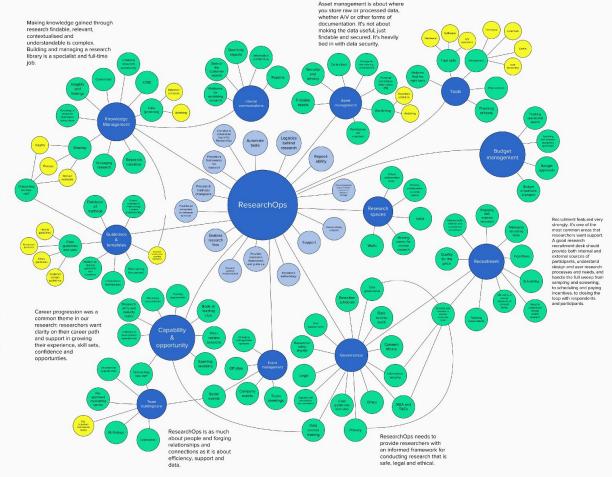

The map's intention is to give a framework for what ResearchOps is. As the practice grows, we expect this map will grow and be refined too.

What about data security, privacy, and procurement?

Data security, privacy, and procurement should be considered in every ResearchOps element you deliver. They're ubiquitous; we've therefore not set them out as discrete elements.

Consider both quantitative and qualitative needs.

The needs of quant and qual are sometimes different; consider this in delivering each ResearchOps element. For simplicity, we've not illustrated this throughout the map; take it as given.

La comunidad de ResearchOps cumple con un marco de habilidades para los investigadores?

La misión de una persona que hace ResearchOps es ayudar a los investigadores a hacer su mejor trabajo.

Así que, como comunidad, a menudo investigamos a los investigadores.

Este proyecto adopta un enfoque participativo para estructurar las habilidades de los investigadores, con el objetivo de liberar un marco que cualquiera pueda adaptar para su uso personal u organizacional. No se trata de operaciones per se, pero creemos que nuestra comunidad está bien posicionada para hacer esta contribución a la disciplina de investigación en general.

Objetivos y outcomes

Darle un nuevo marco y perspectiva para pensar sobre lo que significa trabajar como investigador, y hacia dónde puede ir su carrera.

Conectarse con otros investigadores para que pueda aprender de las lecciones, perspectivas y enfoques del trabajo de cada uno, Proporcione espacio para reflexionar sobre la naturaleza de su trabajo, identifique áreas específicas que merecen tiempo y atención.

Crear datos útiles para que el equipo de ResearchOps publique hallazgos que representen a investigadores de todo el mundo.

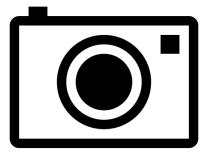

Espacio seguro

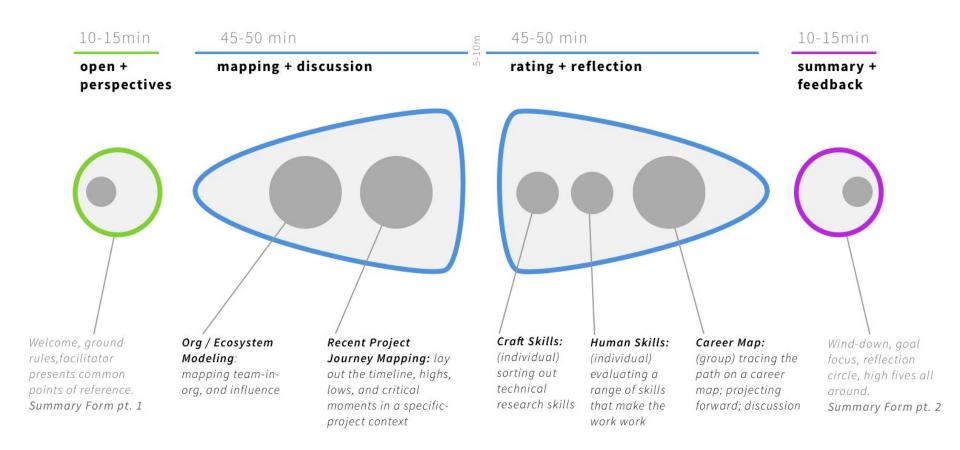

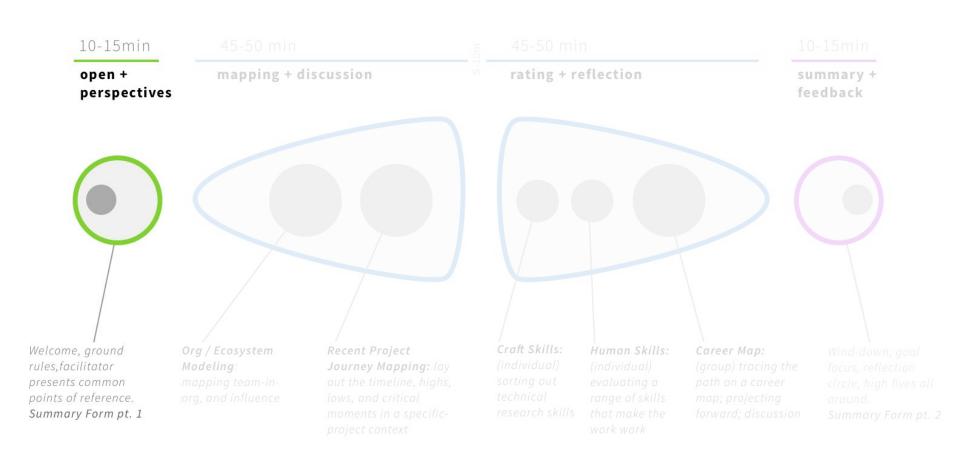

Porfa, pon tu teléfono en silencio.

Fotos?

Qué hacemos hoy:

Actualmente, estás...

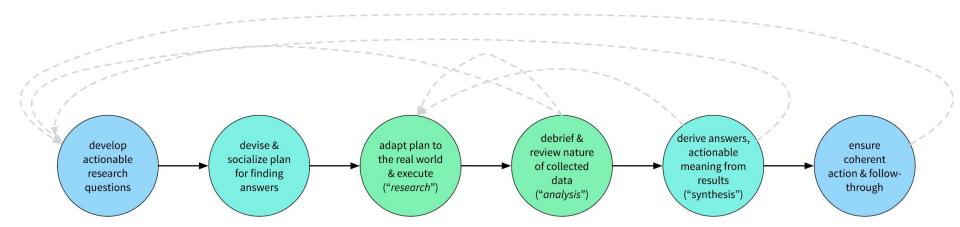

- 1. Trabajo en producto/empresa
- Trabajo en una agencia/consultoría
- 3. Trabajo para el gobierno
- 4. Soy independiente/freelance

- 1. Nuevo
- 2. He estado en este campo por más de 2 años
- 3. Por más de 4 años
- 4. Más de 6 años
- 5. Más de 8 años
- 6. Más de 10 años?

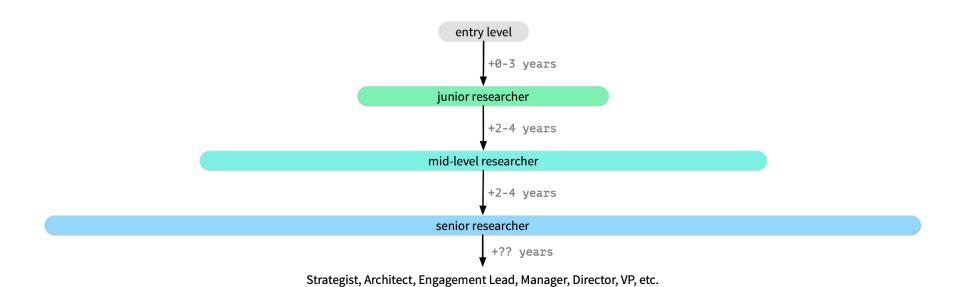

Todas de pié

Perspectivas

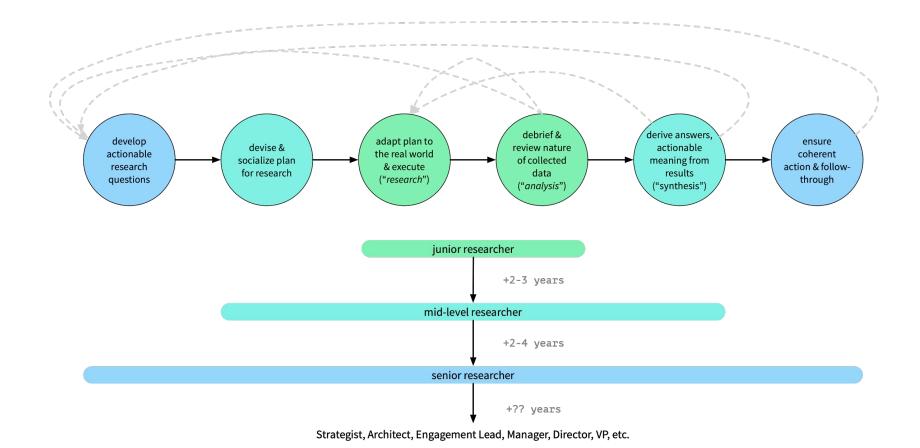

¿Qué es research?

Diferentes niveles

Visión combinada: crecimiento y procesos

Desafíos del trabajo como researcher

Junior researcher

- Coordinación con las partes interesadas multifuncionales
- Entender la parte de cada rol en la prestación de servicios
- Conjunto limitado de técnicas/herramientas de investigación, tareas
- Evaluar honestamente / Reflexionar sobre el trabajo

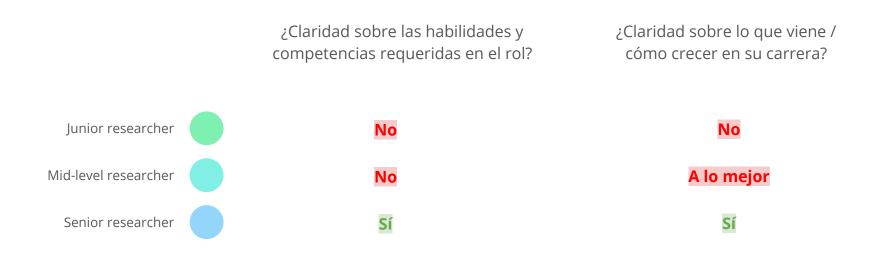

Mid-level researcher

- Falta de influencia en las decisiones sobre los productos
- Comprensión difusa de la estrategia empresarial
- Gestión de los grupos de interés del proyecto, compromiso
- Tejiendo / trabajando con datos cuantitativos

Senior researcher

- Priorización de los trabajos de investigación por orden superior
- Estiramientos demasiado finos;
 siempre adaptándose a los cambios de última hora
- Demostrando el valor de la investigación, estableciendo el retorno de la inversión del proyecto
- Adelantándose al ciclo de entrega del producto
- Influencia en los equipos multifuncionales para la participación

Claridad para destacar y subir de nivel

Barreras para subir de nivel

Junior researcher

- Averiguar qué sigue y cómo llegar hasta allí
- Encontrar buenos recursos y mentores confiables
- Preocupado por no tener una meta específica en torno al progreso

Mid-level researcher

- No jugar un papel más influyente en las decisiones de productos
- Falta de claridad para hacer avanzar la visión de negocio

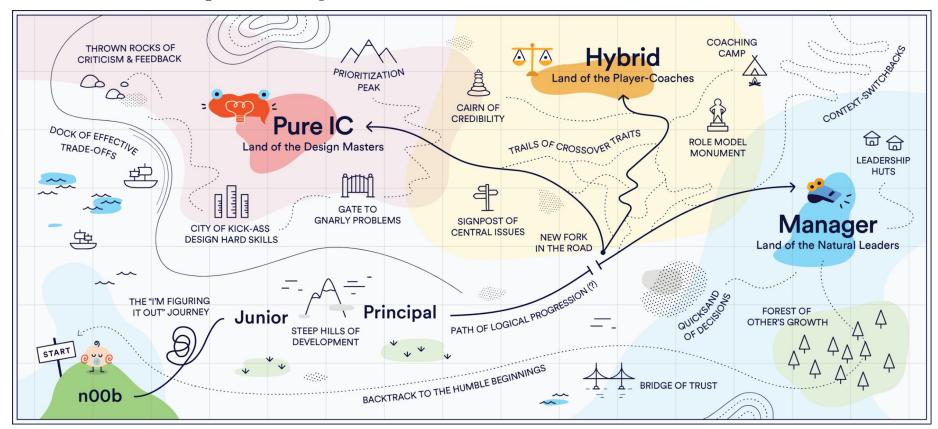

Senior researcher

- No ser capaz de encontrar tiempo para encontrar un mentor
- Siempre teniendo que adaptarse a todos los demás / organización
- La necesidad de ser siempre ágiles con los cambios de última hora

¿Cómo es "mejorar"?

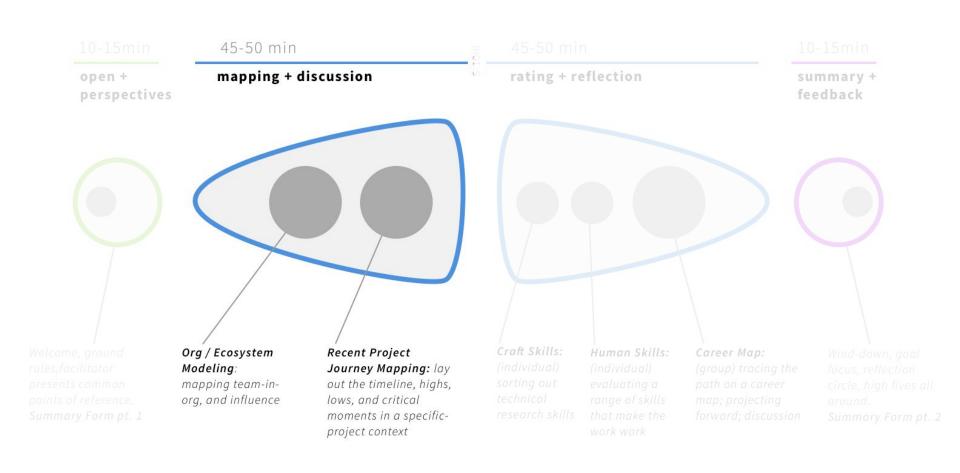

No está claro
 Quisieran hacer un trabajo más útil e impactante
 Quisieran aprender cómo su trabajo se conecta con lo que el negocio prevé.
 Profundizar en las habilidades cualitativas
 Dominio de métodos mixtos
 Responde a lo que "la investigación mínima viable" llevará al progreso

Vista de que hay más allá del senior

Article: "Designing a Better Career Path for Designers" – Siva Sabaretnam // Illustrations: Diana Thai Source: https://medium.com/elegant-tools/designing-a-better-career-path-for-designers-872b0aa50b5b

Mapeo y debate

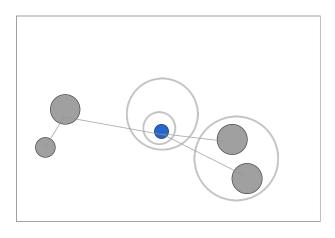

Modelar el Ecosistema en tu org. — Actividad #1

- Coja una hoja de papel y bolígrafos
- Empieza con un punto sombreado para ti, y añade un círculo alrededor para tu equipo....

Modelar el Ecosistema en tu org. — Actividad #1

- 1. Dibuje un círculo más grande alrededor de tu equipo: ¿de qué grupo o unidad de negocio más grande forma parte tu equipo? Etiqueta a ese grupo.
- 2. Añade a tu equipo de diseño y/o producto si aún no forman parte de la imagen.
- 3. Finalmente, piensa en cada equipo/grupo con acceso directo a los clientes: ventas, soporte, consultoría, etc.-añade al mapa y sombreada. Averigüe cómo se conectan contigo.

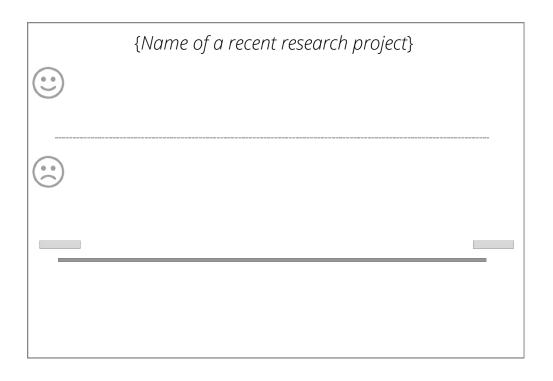

Modelar el Ecosistema en tu org. — Debate

- 1. ¿Dónde encaja tu equipo en la organización?
- 2. ¿Cómo afecta al trabajo que realizas?
- 3. ¿Qué otro equipo tiene la mayor conexión con los clientes/usuarios? Por qué? ¿Qué pasa con tu conocimiento y experiencia?
- 4. Desde tu punto de vista, ¿quién tiene el mayor impacto en su trabajo?

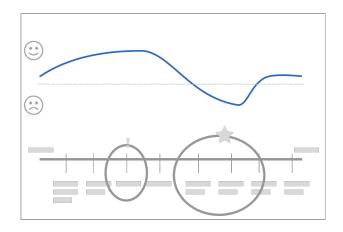

Journey Map de un Proyecto — Actividad #2

- Coje una hoja de papel y bolígrafos
- Traza dos líneas: una línea de emoción en la parte superior (agregue sus caritas felices/tristes favoritas) y una línea de tiempo del proyecto en la parte inferior.

Journey Map de un Proyecto — Actividad #2

- 1. Comienza por llenar un cronograma de eventos importantes del proyecto, cualquier cosa que haya cambiado el estado o el curso del proyecto.
- 2. Ahora piensa y rellena la línea del mapa de viaje del "estado emocional": ¿cómo te sentiste a lo largo de este proyecto?
- 3. ¿Dónde sentiste la mayor frustración? Circule esa área y dibuja un signo de exclamación en tu línea de tiempo aquí
- 4. Finalmente, ¿dónde sentiste que tuvo el gran impacto? Circule su línea de tiempo y dibuje una estrella en su línea de tiempo aquí

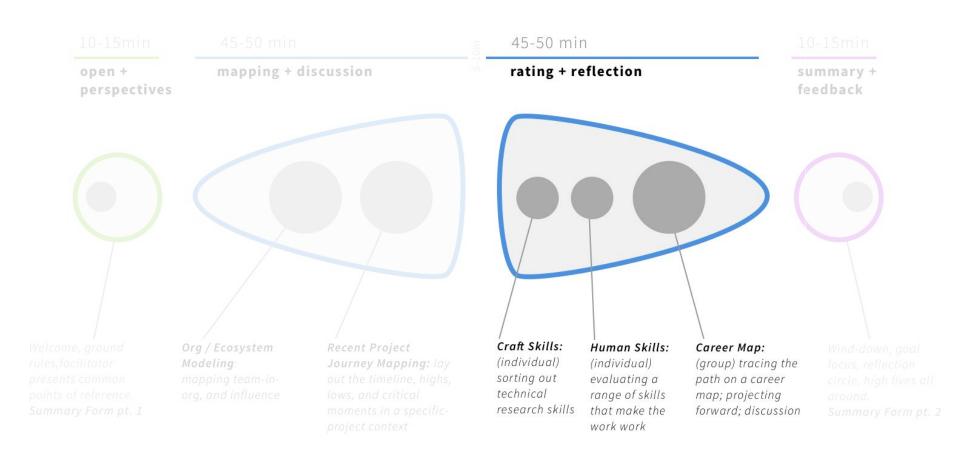

Journey Map de un Proyecto — Debate

- 1. ¿Cómo comenzó tu participación en el proyecto? ¿Cuánta influencia tuviste sobre cómo lo hiciste?
- 2. ¿Qué tipo de evento, acción o resultado lo hizo sentir más impactante?
- 3. ¿Qué condiciones llevaron al estrés o a la dificultad en el proyecto? Por qué?
- 4. ¿Cómo se cerró su participación? ¿Cuáles fueron los resultados finales?

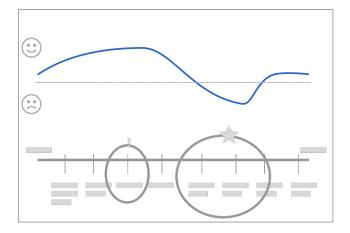

Hacemos un coffee break

Clasificación y reflexión

Craft Skills: Hoja de trabajo #1

- 1. **Rodea con una línea** cada habilidad que has usado en los últimos ~3 meses en un proyecto real; **añade una estrella** a cualquier habilidad que puedas enseñar y explicar a otros.
- 2. Añade los **números "1, 2, 3"** junto a las tres habilidades que creas que son las más importantes para tu trabajo en este momento
- 3. Añade **las letras "A, B, C"** junto a las tres habilidades que consideres más útiles para avanzar como investigador.

Human Skills: Hoja de trabajo #2

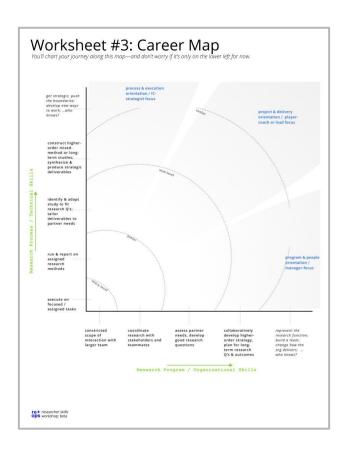

Human Skills: Hoja de trabajo #2

- 1. Echa un vistazo al mapa de tu organización/ecosistema y piensa en tus relaciones con el equipo que te rodea.
- 2. Lee cada una de las Habilidades Humanas en esta hoja de trabajo
- 3. **Rodea con una línea** tu auto-evaluación del estado actual-la sensación de que está bien

Career Map: Hoja de trabajo #3

Career Map: Hoja de trabajo #3

- ¿Cuándo empezaste como investigador? Pon un punto, añade una fecha. En ese primer papel, ¿dónde crees que te metiste? Coloca un punto y rastrea la progresión.
- Pasa al siguiente año o al siguiente trabajo, lo que sea primero: piensa en cómo estabas trabajando, coloca un punto.
- 3. Ahora continúa haciendo un seguimiento de tu progreso para cada año y evento profesional, hasta que llegue el día de hoy.

4. Por último, avanzar algunos años....

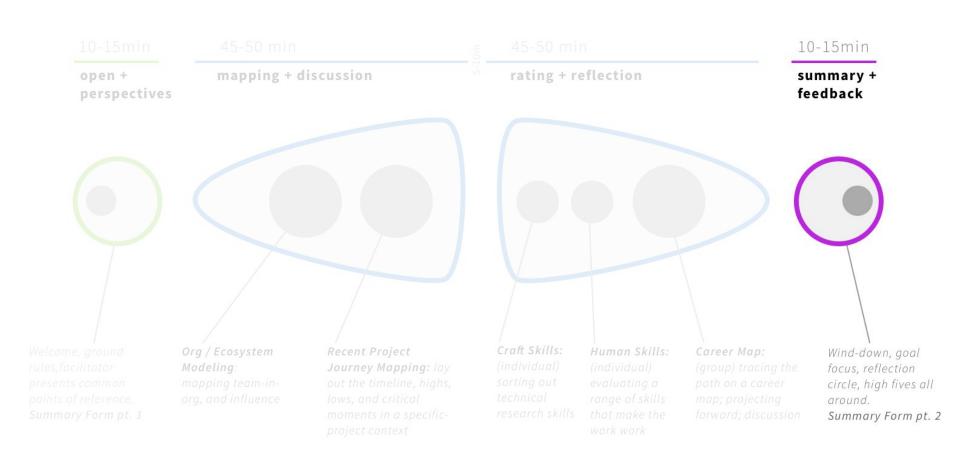

Career Map: Hoja de trabajo #3

- ¿Dónde estás ahora y cómo llegaste allí?
- 2. ¿Cuál es la parte más interesante (la mejor, la peor, la más difícil, la más inusual) de tu viaje hasta ahora?
- 3. ¿Hacia dónde crees que te gustaría empujar? ¿Cómo llegarás allí?

Reflexión

Auto-reflexión

- ¿Qué aprendiste hoy?
- ¿Cuáles serán tus próximos pasos?
- ¿Cuáles son las preguntas que quieres explorar?

Compartir reflexión: alrededor de la sala

Comparte tus reflexiones si te sientes cómoda

iEl último paso!

Rellena la pág 2. Entrégalo a las facilitadoras

Toma fotos para ti, y puedes quedarte con todos los demás materiales de la hoja de trabajo.

Las organizadoras también te enviarán mañana un formulario online de comentarios sobre el taller.

Vears in current role: Official job title: Org. type (circle one): Independent / Consultancy / Startup / Enterprise / Governm Team size—total # researchers: (0 ff or researchers, and you're a designer who does researcher) Org. size—total # people (circle one): self-employed / 1-10 / 11-50 / 51-200 / 201-500 / 501-1000 / 1001-5000 / 5001-10,000 / 10 Very peopling questions Are you a member of the ResearchOps Slack community? Most desired Craft Skills: Write-ins: what did we miss?	A	B C
Human Skills ratings—copy over your rating	from the 1–5 s	cales; circle the 1 area you'd like to improve the most:
Business & strategy insight:		Research operations prowess:
Adjacent disciplines & delivery:		Technical research prowess:
Organizational diplomacy:		Persuasion & articulation:
Service conceptual understanding:		Interpersonal relationships:
Stakeholder mgmt / communication:	_	Professional relationships:
Project management / ownership:		Mindful work & reflection:
Research process management:		
What's the biggest challenge I face	n doing the	work of a researcher?
		work of a researcher?
What do I want to explore next? WI	at am I excit	
What do I want to explore next? WI	at am I excit	red about?
What do I want to explore next? WI What one specific step will I take ne	at am I excit	red about?

Ref: UX Research Maturity Model

	LAGGARD	EARLY	PROGRESSING	MATURE
Exec Attitude	Unconvinced	Cautious	• Enabling	Expecting
Scope What does research cover? What are same of the methods that are being used? How for does research resich in the organization?	Limited to user feedback Market research	Ad-hoc Late-stage testing existing products w/ clients User/advisory groups Log analysis Limited to one business or product	Discovery research w/ client base Consistent, iterative usability testing Monitored Beta & Pilot programs Comprehensive analytics & data collection Participatory design w/ clients, users, etc	Discovery research w/ clients, non-clients Consistent evaluation of current products Explores new markets, audiences Multi-channel touchpoints Spans across organization Not limited to functionality: includes custome experience, recruiting & onboarding, etc
Purpose Why is the regarization inventing in danger research?	• Find what customers don't like	Usability test to predict the future (CYA)	Confirm current product decisions are sound Establish shared understanding of customers and markets by product team	Prioritize where to focus new innovations Inform customer/market segmentation Learn where to adjust product strategy Identify unmet needs
Staffing Who makes up the research team in the organization?	No dedicated research team Product management or marketing interacts with clients May hire perception/market research firm	Designers lead guerrilla usability tests May outsource research to agency	Dedicated research person or team within organization Product management & design support the research team	Management level position to lead alongside product, marketing, commercial etc Resources available for non-research teams to conduct research, report findings
Audience Who uses the findings that come from design research?	• Individual product team	Product management Marketing	Product management Marketing Design Engineering	C-suite (CEO, CMO, etc) Commercial leaders Corporate Strategy External partners
Governance What are the policies to how revearch will be conducted and connintently applied across teams, projects, and the organization?	- none	Little pre-research planning Reports are emailed to stakeholders Little awareness of best practices	Research processes are managed, consistent Follow best-practices Findings are available for wider teams	Decisions are made consulting existing designessearch or create need for more research Strategy, tactics, findings are consistently applied across projects, orgs, businesses
